

Experiments with large-v3
whisper model(noisy)

Sentence confidence

First we start with sentence confidence level in large-v3 whisper model and also noisy Librispeech.

Histogram of sentence confidence (noisy, large-v3)

Let's look at the results for GPT-3.5-turbo first:

We have two models here: gpt-3.5-turbo-1106 and gpt-3.5-turbo-0125

gpt-3.5-turbo-0125

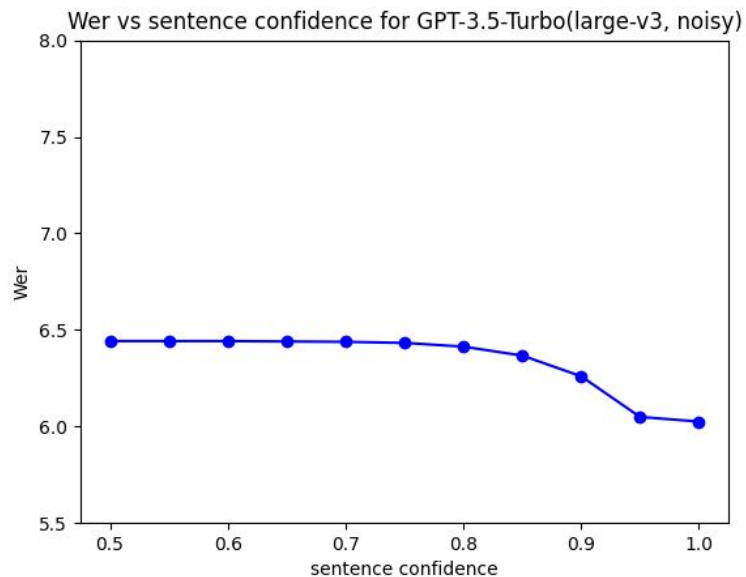

```
Number of evaluated audio files: 2864
WER_original:                    6.4422%
WER_corrected_chatgpt:          6.0254%
CER_original:                   2.5485%
CER_corrected_chatgpt:          2.3402%
SER_original:                   48.9176%
SER_corrected_chatgpt:          46.9972%
---
```

gpt-3.5-turbo-1106

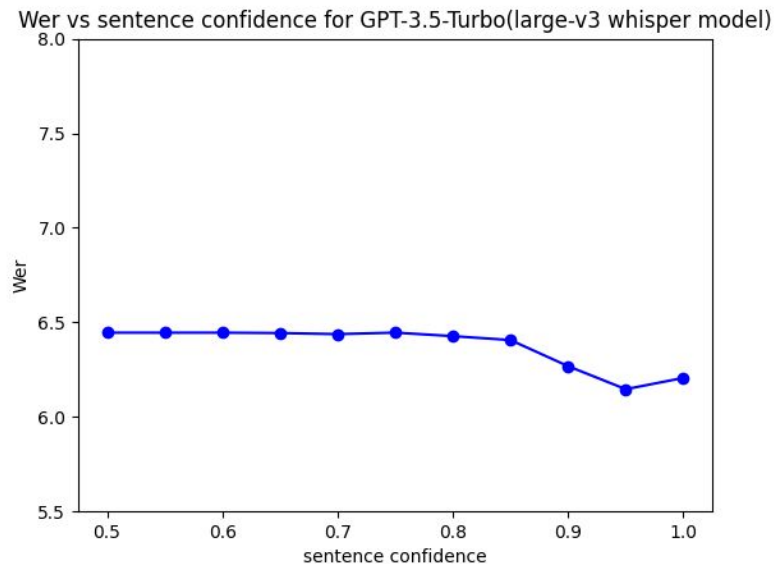

```
Number of evaluated audio files: 2864
WER_original:                    6.4422%
WER_corrected_chatgpt:          6.2061%
CER_original:                   2.5485%
CER_corrected_chatgpt:          2.3904%
SER_original:                   48.9176%
SER_corrected_chatgpt:          47.8701%
---
```

gpt-3.5-turbo-0125

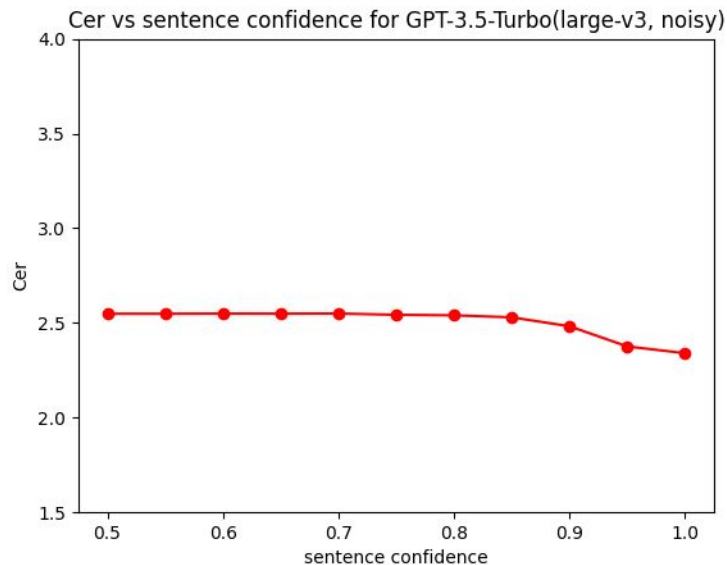

gpt-3.5-turbo-1106

Now let's look at the results for GPT-4-turbo:

We have one models here: gpt-4-0125-preview

Results for gpt-4-turbo

```
Number of evaluated audio files: 2864
WER_original: 6.4422%
WER_corrected_chatgpt: 7.1055%
CER_original: 2.5485%
CER_corrected_chatgpt: 2.7997%
SER_original: 48.9176%
SER_corrected_chatgpt: 52.6187%
---
```

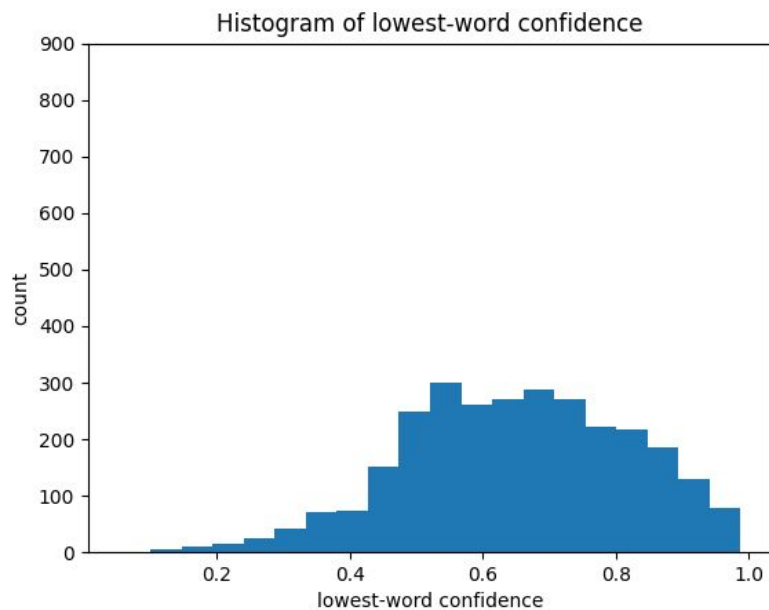

Results for gpt-4-turbo

Lowest word confidence

Second we continue with lowest word confidence level in large-v3 whisper model and also noisy Librispeech.

Histogram

Let's look at the results for GPT-3.5-turbo:

We have two models here: gpt-3.5-turbo-1106 and gpt-3.5-turbo-0125

gpt-3.5-turbo-0125

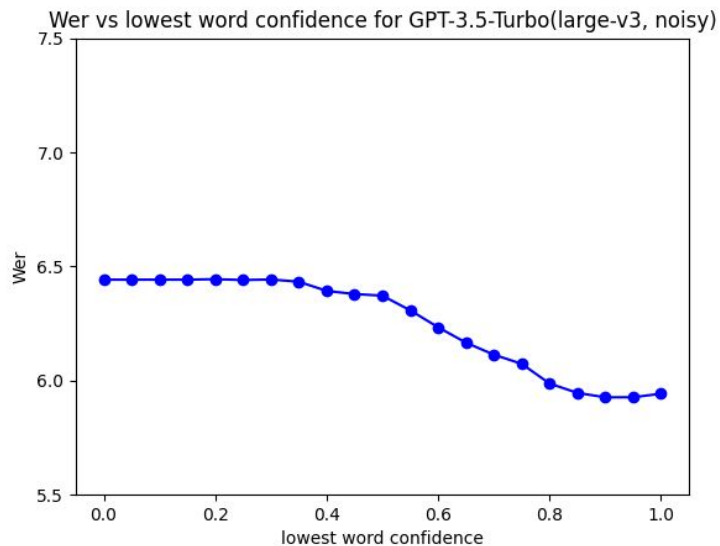

```
Number of evaluated audio files: 2864
WER_original: 6.4422%
WER_corrected_chatgpt: 5.9426%
CER_original: 2.5485%
CER_corrected_chatgpt: 2.3205%
SER_original: 48.9176%
SER_corrected_chatgpt: 46.5084%
---
```

gpt-3.5-turbo-1106

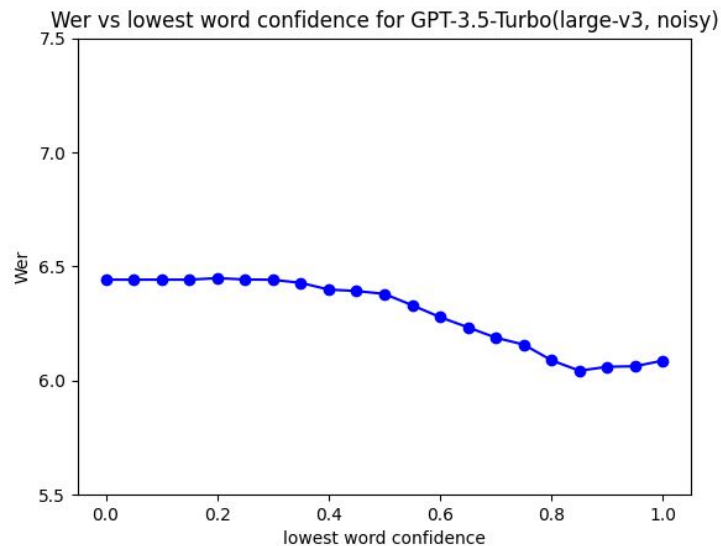

```
Number of evaluated audio files: 2864
WER_original: 6.4422%
WER_corrected_chatgpt: 6.0879%
CER_original: 2.5485%
CER_corrected_chatgpt: 2.3813%
SER_original: 48.9176%
SER_corrected_chatgpt: 47.3115%
---
```

Find best prompt

In this step we use gpt-3.5-turbo.

We have gpt-3.5-turbo-1106 as model.

We have two confidence level: sentence confidence level & lowest word confidence

Old prompt

You are a helpful assistant that corrects ASR errors. \

You will be presented with an ASR transcription of Librispeech data provided by the Whisper model. \

Your task is to correct any errors in the transcription.\

Provide the most probable corrected transcription in string format. \

If you come across errors in ASR transcription, make corrections that closely match the original transcription acoustically or phonetically.\

Do not change the case, for example, lower case or upper case, in the transcription. \

Do not output any additional text that is not the corrected transcription. \

Do not write any explanatory text that is not the corrected transcription.

New prompt

You are a helpful assistant that corrects ASR errors. \

You will be presented with an ASR transcription delimited by {delimiter}

characters,\

and your task is to correct any errors in it. \

Provide the most probable corrected transcription in string format. \

Do not change the case, for example, lower case or upper case, in the transcription. \

Do not output any additional text that is not the corrected transcription. \

Do not write any explanatory text that is not the corrected transcription.
